

Data Mesh: For AI/ML Data Collection

ErgoTech Systems, Inc.

www.ergotech.com

Connection

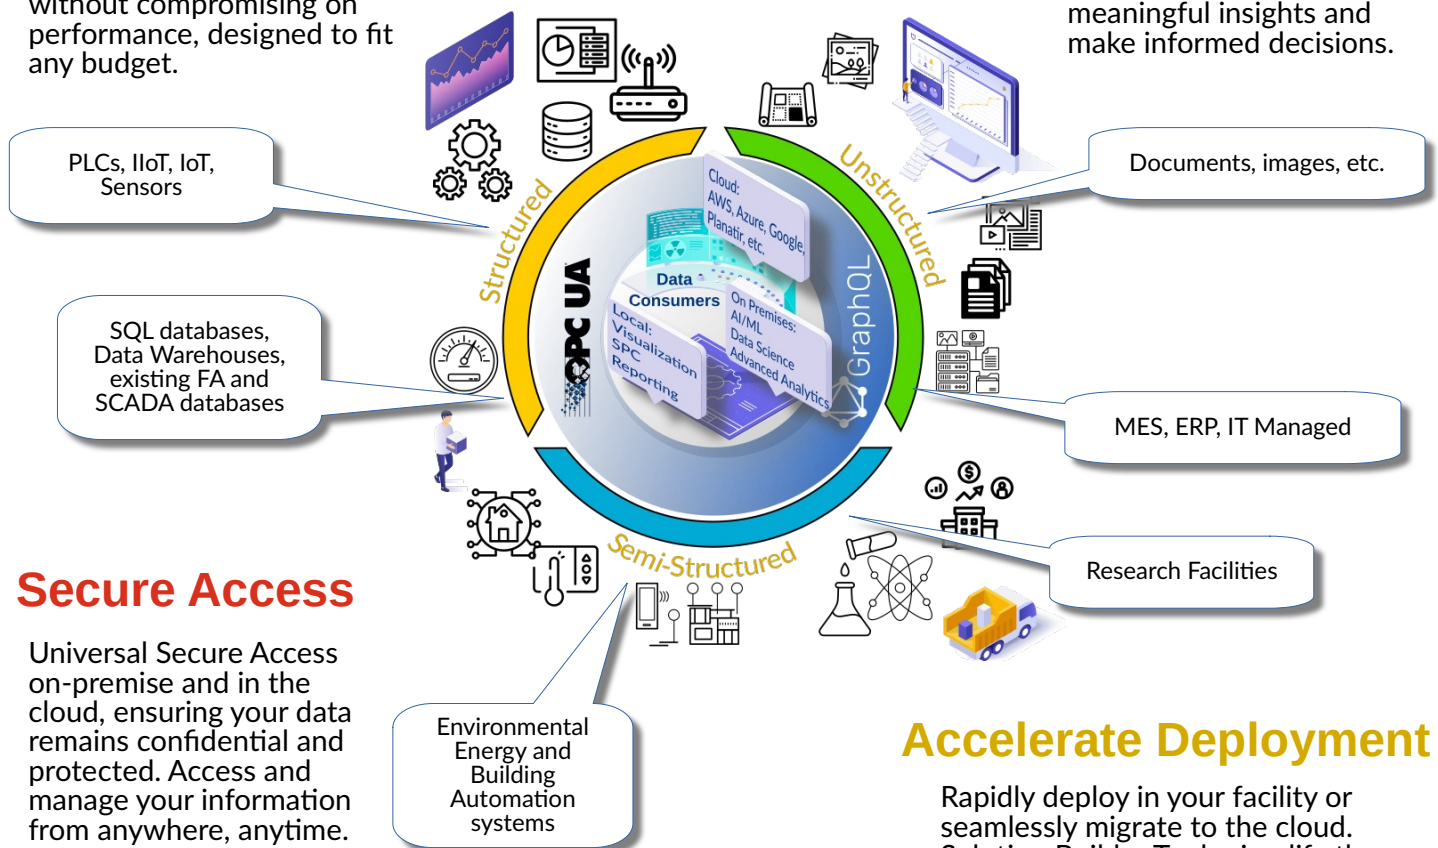

Connect with ease: seamless integration with an extensive collection of 600+ components and connectors, from major systems like PLCs, OPC, Semi-SECS/GEM, MQTT, BAS, MES, ERP to a wide range of industrial devices and systems.

Cost- Effective

Our data integration platform offers cost-effective implementation without compromising on performance, designed to fit any budget.

Data Fusion

Our solution incorporates GraphQL, facilitating efficient integration of diverse data sources. Unlock meaningful insights and make informed decisions.

Secure Access

Universal Secure Access on-premise and in the cloud, ensuring your data remains confidential and protected. Access and manage your information from anywhere, anytime.

Accelerate Deployment

Rapidly deploy in your facility or seamlessly migrate to the cloud. Solution Builder Tools simplify the process, enabling one-click deployment for IoT, Edge, Server, Cloud, and Data Lake environments.

Need Help? We can use our tools to quickly and cost-effectively build a solution for you - from project startup help and training to complete turnkey applications.
