

**Fab Automation
One Step at a Time**

ErgoTech Systems, Inc.

www.secsandgem.com

Trust

ErgoTech has 25+ years experience in industrial automation with a focus on semiconductor fab-tool integration

Capable

Recipe management, online-tool characterization, database integration, data collection, Y-tap solutions

SECS/GEM Standards

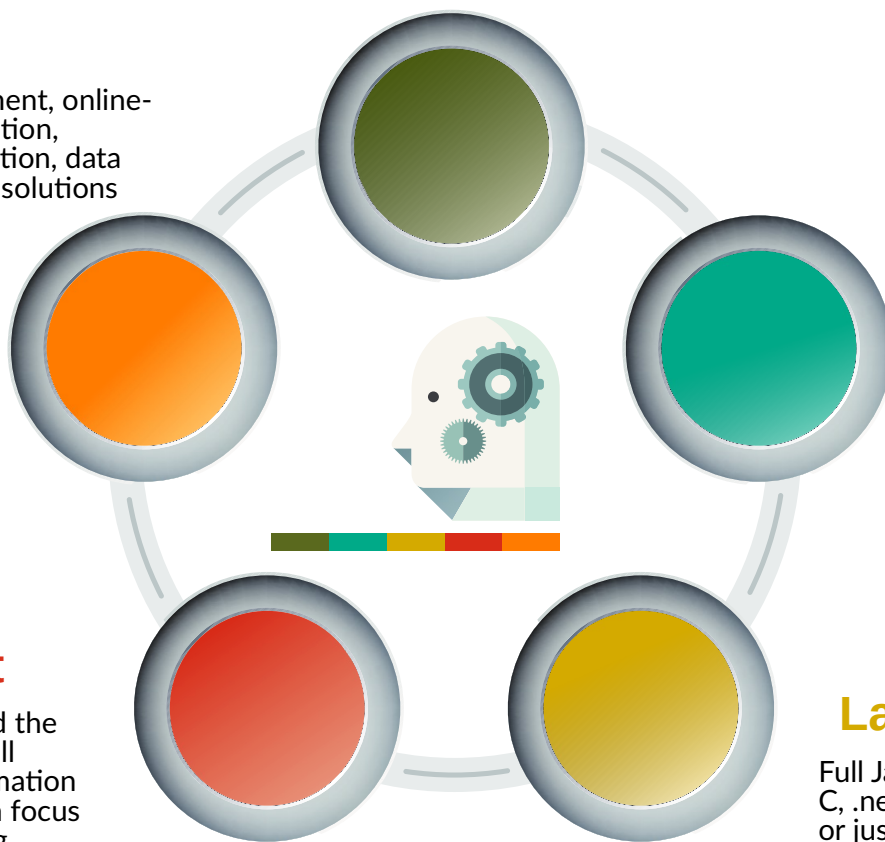

E4, E5, E30, E37, E39, E40, E87, E88, E94, PV2/PVECI, GEM 300, EDA and more...

Languages

Full Java, Javascript, C++, C, .net, Python, and more or just simple scripting with no-node/low-code

Implement

We have simplified the process to build full featured fab automation applications with a focus on problem solving. Build a fab host system one step at a time, one tool at a time.

Need Help? We can use our tools to quickly and cost-effectively build a solution for you - from project startup help and training to complete turnkey applications.
